

I am the president of the Robinson Corporation which operates 4 radio stations in two small communities. I have worked in one of these towns since 1959. We don't program the indecent type of programing that the Commission is concerned about. The demographics don't support it, the communities wouldn't support it, the advertisers wouldn't support it and my work and home phones are in the telephone book. I want thank you notes not irrate phone calls. We have a veteran staff involved in school, church and community activities and they wouldn't support such programing. The cost of purchasing, installing, maintaining and administering a system to record the 96 hours we program per day would place an intolerable burden on our resources both financial and staff. One morning earlier this month one station talked to the local school administrator, a Bush campaign represenative and a local delegate at the Democratic Convention in Boston. This is the type of responsible programing we're striving for. We do hundreds of local, live remotes at sports and community events every year and these would have to be curtailed if the Commission's proposal is adopted.  
Respectly submitted,  
David P. Robinson
